

155010 & 155012

EGG INSULATORS

BLACK EGG INSULATOR (37MM X 27MM) - 155010

Egg insulators are ideal for wire antenna applications. This high strength insulator is made from black HDPE (High Density Polyethylene) It is designed with fully curved surfaces to prevent cutting of wires and will take up to 6mm wires and ropes.

BLACK EGG INSULATOR (75MM X 40MM) - 155012

Egg insulators are ideal for wire antenna applications. This high strength insulator is made from black HDPE (High Density Polyethylene) It is designed with fully curved surfaces to prevent cutting of wires and will take up to 8mm wires and ropes.
