

BE216

TOP POLE TILT PIVOT BRACKET 2" TO 2"

Top pole tilt pivot bracket will sit on top of a 2" or scaffolding (48.3mm) mast and attach a lighter duty pole with a long wire support or similar.

When access is required to the top of the attached pole the lower clamp can be released (BE610 not supplied) and the pole will pivot over the top and allow access to the other end of the lighter duty mast.

Finish: Galvanised
