

# HSB06/100

## SCREWBOLT ANCHOR 6MM X 100MM

Size: 6mm x 100mm. Not suitable for soft brick.

"SCREWBOLT" is a Self Tapping Anchor for Hard Brick, Stone and Concrete. Designed and manufactured in the U.K.

Screwbolt anchors are a new concept in fixing to hard brick and other materials.

The same anchor can be used in all materials just by varying the hole diameter to suit the material. Hex Set Bolt

Hex head fixings as above can be supplied as well as hook and eye bolts.

Its just like screwing a bolt into a tapped hole.

A full range of screwbolts available. Made from Boron Steel, Hardened & Tempered (Tensile strength 800N/mm<sup>2</sup>)

Finish : Zinc and Yellow Passivate

For soft brick we offer Order Code : BE917/10 and 12 Sleeve Anchor.
